(January 30, 2017) – **THE AGE OF ELECTRIC** has announced several Canadian tour dates kicking off March 24 in Vancouver and wrapping up in Oshawa, ON on April 15. See a full routing below. The beloved indie-rockers have also debuted a never-before released track titled “**Th13teen**”, one of **4 previously unreleased songs** recorded during the *Make A Pest A Pet* sessions. Listen + share the track [HERE](#). The band plans to release their influential 1997 album *Make A Pest A Pet*, which features ubiquitous hit single “Remote Control”, as a double LP re-mastered for vinyl to celebrate the 20th anniversary of its release. Fans can preorder the vinyl at this link: <http://we-are-busy-bodies.myshopify.com/>. More tour dates will be announced in the coming weeks.

The original line-up proved recently that the appetite for AOE is as strong as ever with when they performed to an extremely excited sold-out crowd in Toronto, running out of merchandise including t-shirts and vinyl before the band even hit the stage. The four-piece recently premiered a lyric video for the single “Keys” from their freshly minted four song EP to be released February 17, 2017 via **We Are Busy Bodies**. The single is available now on [iTunes](#) + [Spotify](#) and via [Soundcloud](#). **Watch + share the video [HERE](#).**

Formed in 1989 by two sets of brothers from Lanigan and Regina Saskatchewan, The Age of Electric is comprised of Ryan Dahle (guitar/vocals), Kurt Dahle (drums/vocals), Todd Kerns (lead vocals/guitar) and John Kerns (bass/vocals) and remains one of the most successful indie bands to come out of Canada in the mid-90s. After releasing two independent cassettes in the early 90's their commercial breakthrough came with their independent *Ugly* EP in 1993. Self-produced with executive producer **Bob Rock**, it spawned two hits "Ugly" and "Untitled" and set the stage for their full length self-titled release *The Age of Electric* in 1995, which caught the attention of Universal Records Canada who signed them and their label God's Teeth Ethel Records to a distribution deal in Canada. In 1997 they would sign a worldwide record deal with Mercury Records in the US with distribution still in place with Universal Canada. The infectious first single "Remote Control" from the LP *Make A Pest A Pet* became a smash hit on radio, peaking at No. 9 on Canada's Top 100 Singles Chart and #2 on the MuchMusic countdown, and was included on the diamond certified compilation LP, *Big Shiny Tunes 2*.
